OMBRE PERMANENT BROWS	R16 500 7 DAYS
------------------------------	-------------------------

Ombré Brows is a semi-permanent cosmetic procedure used to enhance the shape and fullness of the eyebrow and create beautiful, bold definition. Also known as 'Powdered Brows' or 'Misty Brows,' this technique uses a machine to deposit small dots of pigment into the upper epidermal layer of the skin, giving the brows a soft and shaded make-up appearance. Unlike microblading, which creates fine manually drawn hair strokes, Ombré Brows is used to create a fuller 'shadow' like background and is ideal for clients wanting a slightly bolder look. The Ombré look is typically darker in the tail and body of the brow, with a gradual fade to a lighter appearance in the head of the brow.

This comprehensive curriculum covers all the foundation phase learning for PMU and working with a machine so beginners are welcome.

The program covers

- brow mapping
- hair stroke creation
- shading, ombre effects
- powder application
- color theory
- client consultation.
